

Progress is impossible without change, and those who cannot change their minds cannot change anything.

[George Bernard Shaw](#) (1856-1950) Irish writer

What Professional Bodybuilders FEAR More Than Anything Else In the World....ESTROGEN!

The NEWS Is Out!—This Hormone-Like “HIDDEN” Ingredient In Whey Protein Has Been Slowly Poisoning You With Estrogen, And Here’s Why It Literally....HALTS Your Muscle Growth.

Let’s get right to it!

The ONLY reason you’re here right now is because you want to grow muscle.

Look, I’m 100% sure you’ve already used some muscle building supplement and it didn’t work. And you’ve probably purchased your share of more dietary supplements that didn’t work.

So it’s time to tell those greedy supplement companies that we are....

FED UP! Sick of hearing all the “false claims of huge muscle growth and down right LIES They have been spoon feeding us MONTH after MONTH in the Muscle Magazines!

Obviously What YOU Are Looking For is the ULTIMATE Supplement....

Most Importantly.....

An ORIGINAL one! A supplement that actually works. One that actually lives up to the hype. And one that doesn’t cause any side effects.

One that begins to work immediately and one that tastes good.

Which is why I want to show you something that fits EVERY single one of the above characteristics EXCEPT! For one:

- It's Original
- It works
- It WILL live up to the hype
- It will NOT result in any side effects
- And...It tastes great

Unfortunately there's one I missed out.

Sorry, but this powder does NOT work instantly.

Sorry to tell you this but this powder can take up to 2 weeks (from the beginning in which you start to drink the powder) to work.

Well, sorry to disappoint but its not the "Ultimate" powder but it's the next closest thing to it.

Wow, again my apologies but there is something I haven't mentioned yet. You See—there's one other simply incredible thing about this powder and what it does NOT have. Something that is going to "**shock you into a coma**"....

And once you realize what it is it becomes easy to see why this powder is so EFFECTIVE.

More on that in a sec, but first...

My "Iron Clad Guarantee"....

Embryologic Whey WILL Work Within 2 Weeks After Your First Serving...GUARANTEED

Or We'll Fully Refund YOU!

So now you know the name of our new whey protein. Its called *Embryologic Whey Protein*...

And why can I make this money back guarantee? It's the ONLY whey protein powder that DOESN'T contain a certain ingredient, in fact its the only one in the world!

If you buy Embryologic Whey and find that it doesn't work within 2 weeks we will refund you 100% of your money. That is how confident we are that our whey protein will work for you.

All you have to do is contact us for a "No-Hassle-Free" refund and we will gladly refund you.

So what do you have to lose?

Ready for what I'm going to tell you next? Because most people literally go into fits of rage when I tell them what I am about to tell you next.

Sit down, take a deep breath, and get ready for the most disturbing news about common whey protein....

There is an ingredient in your whey protein powder...

One that literally puts estrogenic mimickers into your body....

This HIDDEN Ingredient "FEEDS" Your Body Estrogenic Compounds!

This hidden ingredient contains three phytosterols....which are structurally similar to synthetic estrogen, which means you are literally swallowing female-like hormonal compounds!

All your hard work to build muscle gets SQUASHED into oblivion and you won't be able to put on an ounce of lean muscle.

What is the "HIDDEN INGREDIENT"?

Its comes from the dreaded soybean. In fact far worse than that, it is a by-product of soybean oil. Experts in the industry call this product **pewtred sludge** containing solvents and pesticides.

They have been using this by-product of soybean oil for decades in whey protein powders, unknowingly subjecting their customers to something very disturbing and that literally halts muscle growth in its tracks!

Little did they know.....that in this by-product of soybean oil...

"Our Sports Nutrition Scientists Would Discover a Previously "UNKNOWN" Compound....

A most ALARMING Compound that has been Scientifically Proven to Result in the Following Side Effects:

- Raise Estrogen Levels in YOUR body
- Obstruct the Production of Testosterone
- Endocrine Disruption Throughout the body.
- Structurally Similar to the soy isoflavones genistein and daidzein as well as synthetic estrogen DES.
- Contains the same doses per serving as a BIRTH CONTROL PILL!

PLUS! The Australia/ New Zealand Food Authority requires that foods containing this compound to **warn women and children NOT to eat them.**

This muscle destroying compound that is in EVERY whey protein powder today has been **FORMULATED OUT OF Embryologic Whey.**

Hold On! Sit Down! And Get Ready for More Great News....Im not done...

Because I have something else I have to tell you about Embryologic Whey...

Not only did we completely remove this estrogenic compound out of Embryologic Whey....

But we (through a 3rd party laboratory) analyzed the most popular selling whey protein in the world and chemical analysis showed it contains the same dose amount, micrograms to micrograms (click here to see comparison) of estrogenic mimickers as a birth control pill!

It's Like Taking Your Sister's, Wife's, or Girlfriends, Birth Control Pills With **Every Single Serving of Whey Protein!**

Now, wipe the tears off your face from the thoughts that you have been drinking whey protein with estrogenic compounds and get ready to see the "pot of gold at the end of the rainbow!!"

Embryologic Whey:

- CONTAINS **ZERO** Estrogenic Compounds
- Increases Protein Synthesis

- Boosts Lean Muscle & Aids at Reducing Bodyfat
- CATAPULTS Muscle Growth
- Sends Strengths THROUGH THE ROOF!

And there's a lot more.....

Embryologic Whey comes with our "IRON CLAD GUARANTEED" not to contain estrogenic compounds.

BUT YOU ARE STILL WONDERING WHAT IS THIS ESTROGENIC COMPOUND IN ALL WHEY PROTEIN POWDERS?

".....I've taken whey protein before and never really experience any gains in muscle..Now from taking Embryologic Whey and *I'm growing like a weed!*"

"I just thought it was normal for my sex drive to decrease as I got older, but after I switched from my normal whey protein that I drank EVERYDAY, and started using Embryologic...My sex drive went through the roof and my muscle started to get bigger!"

Christopher Leonard (San Diego, California)

Soy Lecithin, The Dirty Secret Ingredient, Is This Estrogenic Compound, Found In **ALL Whey Proteins Today!**

When you buy a common Whey Protein today you are buying a Whey Protein that:

- * • CONTAINS **Soy Lecithin**
 - Which in turns contains up to 60mcg of estrogenic mimickers per serving!
 - A popular birth control pill sold today contains only 20mcg of estrogen!
 - May decrease testosterone by increasing estrogen
 - Could promote body fat and contribute to gynocomestia (bitch tits)

* See Fig 1A

Fig 1A

Contains up to 60mcg Soy Lecithin!

20mcg of Soy Lecithin

“.....BEST Whey Protein powder I have EVER Used, Period.....!”

“.....I started in increase my muscle mass and increase my libido after about 5 days using Embryologic Whey. Awesome Product!!! It works!! Best Whey Protein powder bar none!”

John Merkin (Newark, New Jersey)

PROOF! That Soy Lecithin Is An ESTROGEN PRODUCING FACTORY!

Its doesn't really matter how much I or anyone else TELLS you that Soy Lecithin is estrogenic. What you want is to see SCIENTIFIC PROOF that soy lecithin actually contains estrogenic compounds.

In the book by Dr. Kaayla Daniels entitled, “The Whole Soy Story”, she states the following....

The phytoestrogens...bear a strong resemblance to the natural estrogens produced by the human body as well as to the synthetic estrogens found in contraceptive pills. Strictly speaking, soy estrogens are not hormones buy “estrogen mimickers”, but the bottom line is that the human body mistakes them for hormones”

The most common sterols are beta-sitosterol, campesterol, and stigmasterol. Drug companies used them in the 1960's to manufacture human sex hormones.

Phytoestrogens exert estrogenic effects directly and indirectly...

Only one thing is clear: soy estrogens are not weak....

All of this proves one simple fact that.....Soy Lecithin Is ESTROGENIC...And it's USED in all whey proteins BUT

Embryologic Whey, The **Ultimate Whey Protein!**

Embryologic Whey is unlike any other whey protein in the world. It is a patent pending whey protein that does NOT contain soy lecithin. It is designed to pack on muscle mass and keep you 100% anabolic while sending your muscles into a “state of prime growth”!

Listen, whey protein is a great protein, a powerful protein, until Supplement Companies started to add Soy Lecithin to it. If you want to see the REAL power of Whey Protein, do yourself a huge favor and get Embryologic Whey.

“I gained 10lbs of pure muscle in 8 weeks!!! It really makes you grow.....”

Embryologic Whey is freakin Amazing! I gained 10lbs in 8 weeks!!! It really makes you grow. Other whey protein products on the market just don't compare to Embryologic Whey!! Is give it 5 stars!!

Scott Adams, (Willow Grove PA)

ONLY One Company Had the **Balls Big Enough to Sell Embryologic Whey!**

Let me tell you a little interesting story to PROVE to you just how EFFECTIVELY SCAREY our new protein is.

We approached all major distributors of sports nutrition supplements.

THEY ALL **REFUSED** TO CARRY EMBRYOLOGIC WHEY!!

In fact, one even told us that, “He would *COME AFTER* us if we released this product”...

These distributors are **TERRIFIED** of Embryologic Whey. They want us to keep our discovery of estrogenic soy lecithin *under the rug!*

Well it aint gonna happen!

One company **BRAVE ENOUGH** and that believes in “advancement of quality” of sports nutrition supplements stepped up and now distributes, Embryologic Way.

That company.....

CLICK HERE TO BUY

We here applaud them. In fact we bow to them, and so should you...

Unless **YOU** FEAR Embryologic Whey too!

They were one of the FIRST internet sellers of bodybuilding supplements...

They know when they see something "game changing"...

LOOK... I Know What Your Thinking Right Now: These Guys Must Be Out of Their Freakin Minds..This Cannot Be True..

"How Can the Whey Protein I have been Drinking For Years Be Estrogenic?"

We know that you're skeptical, and we would be too. This is the FIRST time Ever that you are hearing something like this. And the doubters and deniers are out there in MASSES waiting to defend soy lecithin! Waiting to tell you that we are nothing but a bunch of lieing sacks of dog terds! Hey, and I don't blame them. We only just blew the lid off of the whey protein industry!

First we say....

DEFEND SOY LECITHIN? That would be like Trying to **DEFEND HITLER!!!**

Next we say...that's because we have a patented pending on Embryologic Whey, we are the ONLY company that can make an instant whey protein without soy lecithin. And we would simply TAKE OVER THE WHOLE WHEY PROTEIN INDUSTRY!

But let me take out my crystal ball for you and predict what is going to happen next.

Our competition first is going to say... "Oh there is ONLY a small amount of soy lecithin in our whey protein, its not going to affect you!"

REALLY????

Can I remind you what I told you above....

**Birth Control Pills Contain 20mcg's of
Estrogen....One Serving of Whey Protein With Soy
Lecithin Contains Up To 60mcg's of Estrogen
Mimickers!!**

Next our competition is going to do something really dishonest and actually ILLEGAL!

They are Going to Deny that Their Powder Does Not Contain Soy Lecithin...

The FDA now states that it is the LAW, that you must put in the ingredients, soy lecithin, if the whey protein supplement does indeed have it.

Why? Because Soy Lecithin Can Be a DEADLY Allergen to some people. Not listing it in the ingredients can KILL Someone.

Supplement Company's know that Soy Protein is like Kryptonite to a bodybuilder, and they now know because of us, so is Soy Lecithin.

They now know soy lecithin also contains ESTROGEN MIMICKERS!!

JUST LIKE SOY PROTEIN!

“Accepting Responsibility for Your Actions, Winning, Always having an excuse for your actions, LOSING”

A quote from Catherine Pulsifer

Don't make excuses for soy lecithin!

THE BALL IS IN YOUR COURT.

This is an opportunity for you to seriously start to grow some muscle and make a BIG Change in your dietary supplement intake and rid your body of estrogen mimickers from soy lecithin.

Yes, you are going to have to change the way you think about whey protein.

Obviously you know what the right choice is and I just hope you make the right one.

HERE'S WHAT YOU SHOULD DO RIGHT NOW!

1. Get Rid Of All Your Soy Lecithin Containing Whey Protein Powder Right now.
2. Tell Your Friends, (Unless You Want to Out-Grow Them), To Get Rid of Their Whey Protein Powders Too!
3. Go here and Buy Embryologic Whey!

Here's to Muscle Growth!

And thanks for listening.

People who wait for changes to occur on the outside before they commit to making changes on the inside will never make any changes at all.
